

NEW PERIODONTAL CLASSIFICATION - DOES IT AFFECT ME?

With Ulpee Darbar
Member of the worldwide working
group for The New Periodontal Classification

INVITING ALL DENTISTS AND HYGIENISTS/THERAPISTS

FREE

"So why change?"

Wednesday 20th March 2018 - 18:30 - 21:00 at Gipsy Lane | 2 Hours ECPD

Euro Perio 9, in Amsterdam in June last year saw the launch of the new classification of periodontal diseases that all clinicians are expected to embrace. The previous classification was developed over 18 years ago and does not reflect the changes in our knowledge or evidence that has come to light in the intervening years of how the aetiology/pathogenesis of periodontal disease has changed. "The New classification brings this into clinical practice and will help in clinical decision making and treatment planning."

Aims and Learning Objectives

Provide an overview of the Key elements of the new classification and how it applies to day to day practice.

The participant should at the end of the session have an understanding of the classification and how it will affect their clinical practice.

Speaker: Dr Ulpee Darbar

Ulpee Darbar is a Consultant in Restorative Dentistry and is the Director of Dental Education for the Eastman Dental Hospital. She is also the Training Programme Director for the Dental Core Trainees. Since her consultant appointment, she has led extensive changes in the Restorative Division and has been instrumental in synergising the concepts of clinical care underpinned by education and training at postgraduate level for dentists, specialists and dental care professionals focussing on periodontal diseases, soft and hard tissue management and tooth replacement with dental implants. In recognition of her contribution to education, she was awarded the UCLHT Chairmans medal for Excellence in Medical Education in 2011 and was the joint recipient of UCLPs award for Director of Medical Education in 2016. She is widely recognised for her specialist interests and lectures and teaches widely in topics of soft tissue management, augmentation in the field of implant dentistry and periodontology and management of failures and treatment planning.

She also holds a number of external positions for the Royal Colleges and Specialist Societies and is currently the Chair of the Advisory Board in Implant Dentistry for the Royal College of Surgeons of Edinburgh.
