PATIENT INFORMATION

GIPSY LANE
ADVANCED DENTAL CARE

ADVANCED CENTRE OF DENTISTRY

BUILT ON REPUTATION

GIPSY LANE ADVANCED DENTAL CARE HAS BUILT AN ENVIABLE REPUTATION AND IS RENOWNED FOR ITS EXCEPTIONAL QUALITY OF WORKMANSHIP AND CLINICAL RELIABILITY. OUR PRACTICE ONLY USES SCIENTIFICALLY DOCUMENTED TECHNIQUES TO ENSURE LONG-TERM SAFETY AND RELIABILITY FOR ALL PATIENTS.

HIGHLY EXPERIENCED

Our highly skilled dentists and dental specialists have a perfect blend of skills to ensure you receive the treatment you need, whatever your requirements.

PRECISION AND EXCELLENCE

Technological excellence, without compromising patient care, ensures the perfect balance of professional etiquette and we pride ourselves on our attention to detail and complete customer comfort.

"The team at Gipsy Lane Advanced Dental Care were amazing. I have an extreme fear of the dentist and the whole team were very kind and accommodating, making sure I knew exactly what needed to be done."
SK Woodley

WHEN MIGHT YOU NEED TO SEE A SPECIALIST?

If you visited your doctor with a problem that required expert knowledge or skills, they would refer you to a consultant or specialist. We are similarly trained dentists and specialists and can offer you the benefit of our in-depth knowledge, skills and expertise for more advanced procedures.

A medical specialist completes a university hospital - based full-time training programme that can take over 5 years to complete. A dental specialist also undertakes full time training as well as many years honing their skills and gaining experience in their chosen field.

OUR HIGHLY EXPERIENCED TEAM of skilled dentists and specialists are actively involved in research, lecturing at universities and training the local dental fraternity.

OUR ADVANCED DENTAL SERVICES

SAME DAY TEETH

With dental implants

This technique is enormously beneficial for people who are suitable and have lost the majority or all of their teeth in the upper or lower jaws. It avoids the need for you to live with a temporary denture in between having your existing teeth extracted and the new dental implants placed – a process that previously could take many months.

The process is quite complex, however patients are always so surprised how little pain and discomfort they actually feel following the procedure. The treatment will be thoroughly explained in detail during your initial assessment with Jatin Desai

Consultation with Dr Jatin Desai £49.00

DENTAL IMPLANTOLOGY

It's always nice to know you are in expert hands

Dental implants are very strong and long-lasting and a great alternative to missing teeth. They are a false tooth root which, when fitted with a crown, completes the whole tooth.

Dr Desai is a highly regarded and well qualified, experienced clinician within this complex area of dentistry and has placed over 3000 implants in the past 20 years with a high success rate of over 99%.

Dr Desai lectures on the subject and is recognised by his peers as one of the most experienced implant dentists in Berkshire.

Consultation with Dr Jatin Desai £49.00

ORTHODONTIC TREATMENT

Teeth Straightening

Orthodontic treatment can be successful at any age.

Adults especially appreciate the benefits of a beautiful smile and one in every five patients in orthodontic treatment is over 21. Adults may also have experienced some breakdown or loss of their teeth and orthodontic repositioning of the teeth may be an essential part of restorative treatment.

Our clinician, Dr John Alper, has been treating adults for many years and is very well versed in understanding adult patient requirements. Dr Alper offers a versatile range of orthodontic treatments from highly advanced braces to near invisible treatment and will happily provide the advice for your personal needs and budget.

Consultation with Dr John Alper £49.00

PROSTHODONTIC TREATMENT

Full mouth reconstruction

There are times when you need a comprehensive restoration service. You may be suffering from advanced gum disease, missing teeth or damage to existing teeth worn down after years of grinding. If your teeth have generally fallen into disrepair you will be advised to see our specialist prosthodontist who has advanced knowledge and experience in how your teeth and jaw function, as well as skills and expertise in cosmetic dentistry.

Our clinical team is setting the standards together and work seamlessly as a multi - disciplined team to achieve noticeable results which will help you to look and feel more confident. A course of treatment can vary enormously but may include root canal therapy, periodontology, crowns and dental implants to create a smile for you which will restore your confidence again.

Consultation fee £49.00

PERIODONTAL TREATMENT

Gum Treatment

Many of the most serious problems with your teeth are in fact problems with your gums. Gum disease is the biggest cause of tooth loss among adults in the UK. We want to enable you to keep your teeth for life and to restore your gums to health. We are very fortunate to have Miss Ulpee Darbar, a specialist in Restorative Dentistry and Periodontology and a world-leader in her field at our practice.

If you are suffering from gum disease, do not despair. Our warm and caring periodontal specialist, Miss Ulpee Darbar will take care of you. During your consultation Miss Darbar will be able to assess your condition and develop a plan of treatment specifically for your condition. Working in collaboration with our hygiene team, Ulpee will ensure that your gums are healthy and help you keep your teeth for life.

Consultation with Miss Ulpee Darbar £180.00

ADVANCED SMILE DESIGN

We use a state-of-the-art 'Smile Simulator' to digitally reconstruct your smile to show you exactly how it could look – so you can actually try your smile before deciding on treatment.

The system enables you to see what your new smile will look like before we start to work on your veneers or crowns.

Having a smile makeover can make a huge difference to the way you look and feel. Many of our patients say their life has changed afterwards, simply because they have so much more confidence. Our expertise, coupled with our wide range of sophisticated technology (perhaps only rivalled by Harley Street), means we can offer you the most effective and highest quality ways of enhancing your smile.

Consultation fee £49.00

ENDODONTIC TREATMENT

Root Canal treatment

A course of root canal treatment involves the removal of the infected pulp and filling the root canals. This can save your tooth, enabling you to keep your natural teeth for years to come.

Our Endodontist is registered with the General Dental Council (GDC) as a dental specialist and has studied for a number of years beyond his university degree in dentistry.

Using our state-of-the-art operating microscopes, digital imaging, ultrasonic instrumentation and fibre optics, our Endodontist will treat you quickly and comfortably. He is efficient and precise giving you a positive experience and faster healing.

Consultation Mr Federico Foschi £75.00

ORAL SURGERY

As dentists we can do a large number of surgical interventions in the mouth. The term "minor oral surgery" refers to smaller operations and includes removing wisdom teeth, impacted teeth, and severely broken-down teeth, as well as apicectomies, biopsies and other procedures.

Within Gipsy Lane Advanced Dental Care our oral surgery is largely carried out by 'dentists with a special interest in oral surgery'. We work under surgical theatre conditions where our Oral Surgeon performs a range of surgical procedures for patients who have been referred by their general dental practitioner.

Patients are usually referred to our practice for the removal of teeth by your referring practitioner following a discussion with you.

Consultation with Dr Raj Murugaraj £49.00

IV SEDATION BY CONSULTANT ANAESTHETIST

Whilst the vast majority of your dental treatments can be carried out under local anesthesia leading to a pain free experience, some patients may find it more tolerable with a degree of conscious sedation.

This sedation is very different from dental chair anesthesia or even 'light general anaesthesia'.

The clinical provision of conscious sedation will allow you to walk in and have your treatment carried out and then be able to leave our practice in a relaxed state with a responsible person to aid you.

Consultant Anaesthetist £308 per hour

HOW CAN I BE REFERRED?

Your dentist can refer you to us by completing a dental referral form, which includes medical history and relevant information about your condition

or

You may refer yourself. Many of our patients have been recommended by their friends and family.

A REFERRED PATIENT

It is important to remember your normal dentist will continue to provide your general dental care as you will still be registered with him/her.

Gipsy Lane Advanced Dental Care is a referral centre and cannot accept you as a general patient if your dentist has referred you to us.

APPOINTMENTS AND EMERGENCIES

If you have a dental emergency during practice hours, please contact us immediately. We will always try to see a patient in pain on the same day. For emergency help outside practice hours, please telephone 0118 966 5656 and listen to the answer phone message for advice and contact numbers.

DISABLED ACCESS

We have disabled parking, a ground floor surgery, plus ramps where necessary and disabled toilet facilities. If you have any special requirements, please call in advance to ensure we are able to meet them.

PARKING

Our practice has a large car park right in front of our building, with plenty of space for your car. It's hassle free parking.
