

GIPSY LANE
ADVANCED DENTAL CARE

REACHING YOUR PEAK

Minor oral surgery course

Aims and objectives

Overview of minor oral surgical procedures carried out in general dental practice and to improve the provision of these procedures by the GDP.

To provide opportunity for dentist's to gain confidence to perform simple surgical extractions within the general practice.

To understand basic surgical principles including flap design, suturing techniques and bone removal.

To identify risk and manage complications in minor oral surgery and to understand when and what to refer.

The above aims and objectives are supported by series of lectures, case discussion and hands on practical skills on a pigs head.
